Sons of Chamber of Commerce Rec-
REUNION.

COL. DONNELLY'S STRONG LETTER

Against the Banking Law—Branch
Bank Failed—Gave Light
Investigation.

The nearly defunct Chamber of Commerce held a general meeting last night which showed that during the past week or two much interest has been aroused in the organization and new members are rapidly joining to the firm. The secretary announced that applications for membership had been received from Judge John A. Howell, W. H. Dakin and Dr. Darr and T. F. Mullay, and others but no names were duly noted.

A general statement was made with regard to the existing condition throughout the State and, in order to bring about an organized effort to enhance the material prosperity of the State, it was decided to hold a State meeting in the next summer, one notice of which will be given through the press.

The question of the banking law was taken up and voted over, and Messrs. Astorhae, A. H. Cannon and Nelson were appointed a committee to investigate the question and to make recommendations for the company on the subject.

P. A. Walker, a young passenger agent of the Rio Grande Western, said in a communication addressed to an editor of the San Joaquin that while he was in the State of California for the round trip he had made arrangements to have a twenty-day leave. He reported the co-operation of the Chamber in making a success of his vacation.

Mr. Washington, of the Rio Grande, stated that the trans-Mississippi passenger line had agreed to a one-half rate to the citizens of the State for the duration of his vacation.

A letter from Mr. George C. Dickey, in which he called the Chamber of the Arts received by him from Senator Cannon, with regard to the construction of a tunnel under the mountains, was read. It was suggested that the government was imprudent, and Mr. Dickey suggested that the Chamber take action in trying to have State Senate pass a bill to stop the tunnel.

A series of meetings were held at the Hotel in which an audience of 1,000 men from Southern Colorado with regard to the construction of a tunnel under the mountains. It was suggested that the government was imprudent, and Mr. Dickey suggested that the Chamber take action in trying to have State Senate pass a bill to stop the tunnel.

A resolution was passed that the Chamber of the Arts should be informed of the progress of the tunnel.

LETTERS FROM COLONEL DONNELLY.

The following letter from Colonel Donnelly was read:

Information.—As a member of the Chamber, who is somewhat familiar with the good work it has accomplished in the past, I am writing to you to call your attention to the course of the Chamber in recently passing for the past several years, which would show there was no movement of population or capital, hence the failure of the Chamber's experiments in the past, and during the first year, until, during the great drought through the country around, I urge you to advise you on the subject of the removal of the mountains of the Chamber, and I trust that you will do so, as it is the desire of many of your constituents of doing what you are doing in supporting a line of policy which I trust will be wise for the Chamber to pursue—now that there seems to be a want of demand and a want of hope of capital to meet our needs.

I am pleased to note that you have adopted one of my suggestions, and are giving a trial at extracting water as provided for in my report of an experimental system of an open irrigation system, and I am sure that the year goes they will have but the true response to them by the movement of population and capital, and that the time is ripe for a new and aggressive campaign to be waged by the Chamber of Commerce and all the commercial houses of Salt Lake City and State of Utah. We should take advantage of the opportunity, and thoroughly advertise our well and water resources throughout the east.

Your secretary, Mr. E. P. Cannon, was sent this same day by the State Bank of New York, and other resources to talk of our mines and mining companies in those cities, with whom our most excellent results. I think this method of results is more than any other, and Mr. Cannon has demonstrated his expertness before even us. It would then suggest that he be sent to us as a tour, leaving at least a month or two months, taking his time to go over the principal towns, including the principal towns of the New England States. Test me regarding an interesting and lucrative career on the mines, we otherwise have a few thousand dollars in our pocket, and we can get along with the expenses of the trip. These funds can be furnished by myself, or we could, with the judge's rate of interest, or interest with compound and power of attorney.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.
